DETAILED ACTION

1. Upon review of applicant's response/amendment dated 11/7/2006, it is noted that a restriction/election is warranted.

Election/Restrictions

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Controlling a speed of a vehicle when actual speed exceeds a set point speed by more than a first predefined speed difference.
- II. Controlling a speed of a vehicle when actual speed exceeds a set point speed by more than a first predefined speed difference and when actual speed exceeds the set point speed by a second predefined speed difference which is smaller than the first predefined speed difference.
- III. Controlling a speed of a vehicle actual speed exceeds a predefined speed more than a first predefined speed difference and when actual speed exceeds the set point speed by a sixth predefined speed difference which smaller than the first predefined speed difference.

3. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 3663

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claims 12, 15 and 22 appear to be generic.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: There is no special technical feature when considered as a whole defines a contribution over the prior art of record. Such is evidenced by the PCT Search Report (PCT/ISA/210). See DE 196 54 769 A.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
